

Diagnosis Matching Edits Policy Update

MVP Health Care® (MVP) utilizes Diagnosis Matching Edits based on select Medicare Local Coverage Determinations (LCD) or National Coverage Determinations (NCD) for medical procedures.

In November 2018, MVP communicated the adoption of the Centers for Medicare & Medicaid Services (CMS) LCD to access the appropriate diagnosis to be used with the below procedure as outlined in the applicable LCD.

Diagnosis Code	Diagnosis Description
82607	Laboratory Examination Cyanocobalamin Vitamin B12

Effective July 1, 2020, MVP will deny claims if the appropriate diagnosis code is not utilized as outlined above. To review this policy, please refer to mvphealthcare.com/PRM and select the Diagnosis Matching Edits Payment Policy.

For more information on Medicare Local Coverage Determinations, please visit cms.gov and select the *Medicare Coverage Database*.
