## Action Required—MVP At-Home Collection Kits Program

MVP Health Care® (MVP) is committed to working with Participating Providers to help improve our Members' health and well-being. In recent years, at-home testing has transformed health care services. Not only does at-home testing offer convenience and privacy, but it can also improve health outcomes, patient adherence, and patient engagement. While some screenings, like a colonoscopy, continue to be considered the gold standard, at-home testing can help Members get access to these important screenings by reducing common barriers such as transportation, childcare, or time off from work.

**Starting in late summer 2024, MVP will send at-home collection kits to select Members who are overdue for their:**

- Colorectal cancer screening
- Kidney health evaluation
- Hemoglobin A1C testing

The MVP At-Home Collection Kits Program is intended for Members who are low risk and overdue for important screenings. Some Members may be excluded from receiving at-home kits due to serious co-morbidities or other criteria. Additionally, MVP will only ship the colorectal cancer screening kits to Members who do not have a history of any condition that puts them at higher risk of colon cancer, utilizing the CMS high risk codes found on [cms.gov](https://www.cms.gov). Once the kits are shipped, MVP will send you a report, so your practice knows which of your patients received kits.

Our vendor partner that processes the collection sample will send the results directly to the Member and to your practice via mail or fax.

### Action Required

It's important that we work together to make sure this program is aligned with your patients' needs. If you believe the MVP At-Home Collection Kits Program is not appropriate for your patients, visit [mvphealthcare.com/TestKits](https://mvphealthcare.com/TestKits) and respond by August 2, 2024.

We understand the high demands on practices and how busy you are. MVP appreciates your attention to this matter and your continued partnership in improving our Members' health outcomes.

If you have any questions, please contact your Professional Relations Representative.
