Register Now for Availity Essentials

MVP Health Care® (MVP) is pleased to collaborate with Availity® to offer Availity Essentials™, a secure, web-based, multi-payer portal that helps simplify administrative and clinical workflows for health care Providers.

Starting July 20, 2026, Providers who see MVP Members can use Availity Essentials to perform several activities electronically, including claims submission, claim status inquiry, eligibility and benefits inquiry, Member search, and Electronic Prior Authorization for prescriptions, genetic testing, and oncology services through tools in the *MVP Payer Space*.

Sign up for Availity Essentials today and join the growing number of Providers using MVP's new portal to work faster, save time, and reduce administrative effort. Availity offers one secure place to complete key transactions when working with MVP.

Action Required: Register for Availity Essentials

- To register, your organization must first designate an Availity Essentials administrator. This person will register your organization, manage user accounts, and should have legal authority to sign agreements on behalf of your organization.
- If you are the administrator for your organization, go to **availity.com**, select *Portal Login* in the upper-right corner, then select *Create Account*. Once your account is created, you will begin receiving training information to help your team get started with MVP in Availity Essentials.

Availity also offers training resources for new users. After signing in to Availity Essentials, select *Help & Training*, then *Get Trained* to access available live and recorded webinars.

For registration instructions and additional support, visit **mvphealthcare.com/providers/education**. Under *Availity Essentials*, you can access the *Availity Help Center*, registration training information, and MVP's *Frequently Asked Questions* resource.

Your current MVP Provider Online Account will remain available during this transition, and MVP will continue to share updates as more Availity functionality becomes available.

If you have questions, please contact your Provider Partnership Liaison or Provider Relations Representative.
