## Eye Exam for Patients with Diabetes (EED)

### Measure Description

Members 18-75 years of age with diabetes (Type 1 or Type 2) who had retinal screening or monitoring for diabetic retinal disease during 2024 or 2025.

Any of the following meet criteria:

- A retinal or dilated eye exam by an Optometrist or Ophthalmologist in 2025
- A **negative** retinal or dilated exam (negative for retinopathy) by an optometrist or ophthalmologist in 2024

Presence or absence of retinopathy **must** be represented by a CPT II code on claims. This may determine whether the Member needs another eye exam in one year or two years. Absence of a CPT II code will result in Members who do not need an exam appearing in gaps in care reports.

PCPs can submit the ICD-10-CM diagnosis codes and the appropriate CPT Category II codes to meet diabetic retinal exam HEDIS technical specifications when documentation shows the exam was performed by a vision Provider.

PCPs who perform a diabetic retinal exam and send the test to a vision Provider to obtain the results of the exam will be reimbursed at a global level. Payment to the Provider who reads the test performed by the PCP remains a business arrangement between those two Providers.

When the exam is performed by the PCP and read by a vision Provider, **the claim must be billed with the appropriate CPT Category II code (with no modifier) to meet the HEDIS technical specifications indicating the services were performed by a qualified vision Provider. This impacts quality ratings.** *If your office is unable to bill CPT Category II codes, please contact your Professional Relations Representative.*

## Tips and Best Practices to Help Improve Performance

- Utilize the monthly Gaps in Care Report (GIC) for a list of MVP Members and the services they still needed. Your patient may have had a retinal eye exam prior to their enrollment with MVP. The patient will have an open gap in care for this measure until medical record documentation is submitted to MVP. Please refer to your GIC report for instructions about how to submit medical records to MVP to close gaps in care.
- Encourage billing staff to use CPT Category II codes which are intended to facilitate the collection of information about the quality of care delivered by coding specific services or test results that support performance measures. CPT-CAT-II codes will lower the need for record abstraction and chart review and minimize the administrative burden.
- Consider the use of a retinal imaging device in your practice. An optometrist or ophthalmologist must interpret results.
- Order and schedule eye exam appointments before the patient leaves the office. Have a list of facilities available to share with patients.
- Consider using alerts and flags within the Electronic Health Record (EHR)
- Discuss the importance of early detection and encourage screening and refer annually
- Document preventive care, medical, and surgical history in the medical record with specific dates and results
- Submit results to your local Regional Health Information Organization (RHIO)
- Use correct diagnosis and procedure codes and submit claims and encounter data in a timely manner
- Provide patients with the MVP Eye Care Consultation Form:
  - [MVP Eye Care Consultation for Diabetic Patients \(English\)](#)
  - [MVP Eye Care Consultation for Diabetic Patients \(Spanish\)](#)
- Stock patient areas and exam rooms with educational materials such as those found here:
